HTML Assignment

Complete the assignment using the given instructions:

1. **Heading:**

   o   Use the <h1> tag to create a main heading for your page, welcoming visitors to your assignment project.

2. **Paragraph:**

   o   Utilize the <p> tag to create a paragraph that briefly describes your assignment. Provide information about the purpose and content of the project.

3. **Anchor Tags:**

   o   Create a list (<ul> and <li> tags) with four items, each containing an anchor (<a>) tag.

   o   The first item should link to your email address using the mailto: attribute.

   o   The second item should link to a phone number using the tel: attribute.

   o   The third item should link to a WhatsApp message using the https://wa.me/ URL.

   o   The fourth item should link to an external website, opening it in a new tab (target="_blank").

4. **Image (img) Tag:**

   o   Insert an image into your project using the <img> tag. You can use any image file, and make sure to set the alt attribute to provide alternative text.

5. **Video Tag:**

   o   Embed a video into your project using the <video> tag. You can use a local video file or a video from an online source. Include controls for play, pause, and volume.

6. **Audio Tag:**

   o   Add an audio file to your project using the <audio> tag. Provide controls for play, pause, and volume. You can use a local audio file or an online source.

7. **Embedding YouTube Video:**

   o   Embed a YouTube video on your page using the <iframe> tag and the embed code provided by YouTube.

8. **Embedding Instagram Post:**

   o   Embed an Instagram post on your page using the <blockquote> and <script> tags. You can find the embed code on Instagram for the post you want to display.

Test your links and embedded content to ensure they work as expected.
